

Exam 02 review

Prof. Eric Friedlander

Exam 02

- 20% of final course grade
- In-class: 75 minutes during Wed, Dec 3

Content

- Cumulative with a focus on material since Exam 01
- All content from Exam 01 plus:
- Fitting, interpreting, comparing, and evaluating multiple linear regression models
- Transformations
- Outliers
- Multiple Linear regression
- Categorical Variables
- Interaction Terms
- Conditions
- Multicollinearity
- Model Comparison

Outline of in-class portion

- Closed-book, closed-note.
- 8-10 questions, some with multiple parts
- Question types:
 - Multiple choice
 - Short answer (no more than 3 sentences)
 - True/ False.
 - * If false, write 1 - 2 sentence justification about why it is false. Must get justification correct to receive credit.
 - Evaluate a response.
- Last page will have analysis output.
- Just need a pencil or pen. No calculator permitted on exam.

Format

- Four types of questions (potentially divided into sections)
 - Multiple choice (concepts, interpretation)
 - Short answer (concise reasoning, set up calculations)
 - True/False with justification (1–2 sentences)
 - Evaluate a response (diagnose a student's statement)
- Emphasis on interpretation and understanding
- You will not write code; you may be asked to interpret provided output

Practice

Exam 2 Practice: [ae-19-Exam2-practice](#)
